University of Denver – *Full Stack Web Development*

Denver, Colorado

September 2023

Comprehensive training in front-end and back-end technologies for web application development, including HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB. Hands-on projects and mentorship provide practical experience and skills essential for versatile roles as a full stack developer.

Northern Kentucky University – *Business Management*

Alexandria, Kentucky

2018

Projects

[Wags to Riches](#)

Source: <https://github.com/S10skeleton/Wags-to-Riches>

Wags to Riches is designed to help connect adorable pets to loving families! This project pulls from the PetFinder API, returning pet data such as breed, location, name, and photo data. It uses Node.js, handlebars, MySQL, and express.js.

[Employee Tracker](#)

Source: <https://github.com/heyitsmejadah/employee-tracker>

This application makes managing an employee database easy. View, add, update, and delete all departments, roles, employees, and budgets in one place! Requires usage of Inquirer, MySQL2, and express.js.

[Beat Buddy](#)

Source: <https://github.com/33649EK/beat-buddy>

BeatBuddy is your friendly music hub! This is a web application that queries YouTube and MusicBrainz API and returns music videos and artist information. It uses JavaScript, jQuery, HTML, and CSS.

[Ecommerce Back-End](#)

Source:

<https://github.com/heyitsmejadah/ecommerce-backend/blob/main/README.md>

This project is a CRUD app for an ecommerce site. It uses MySQL, express.js, sequelize, and dotenv.

[SVG Generator](#)

Source: <https://github.com/heyitsmejadah/svg-generator>

This project is a CLI utility to generate an SVG logo with shapes and text. It uses Node, Inquirer, HTML.

[Note Taker](#)

Source: <https://github.com/heyitsmejadah/note-taker>

Note taker is a simple note taking CRUD app. It uses a simple JSON file as a database backed by a node server.

[Weather Dashboard](#)

Source: <https://github.com/heyitsmejadah/weather-dashboard>

This webpage uses the OpenWeatherMap API to display a five day weather forecast, including today's forecast based on the city provided.
